Clean Water Technology, Inc. Hires New CEO – Mike Yeager

Clean Water Technology, Inc. (CWT), a global leader in water and wastewater treatment technologies, is pleased to welcome Mr. Mike Yeager as its new Chief Executive Officer (CEO).

"Having known Mike for the last 10 years, I have seen firsthand his incredible drive, leadership and effective management style. CWT is in a critical time of global expansion while servicing and expanding our capabilities for current customers/partners. CWT's technology fleet consists of the best available engineering and water treatment equipment in the marketplace. Mr. Yeager's impressive track record and experience will take CWT on an aggressive path as a premier supplier of water and wastewater treatment plants," said Ariel Lechter, current CEO / President.

Mike Yeager, CEO
Clean Water Technology, Inc.

Mr. Lechter will continue his role at CWT as President.

Mr. Yeager comes to CWT with 39 years of experience and a solid leadership background developed throughout his career while working in executive level positions within multiple industry channels which includes several Fortune 500 companies. His breadth of responsibilities included; operations, engineering, continuous improvement, business development, and sustainability. Mike's experience and skills will help CWT continue its growth and enhance the company's expert reputation in the wastewater treatment industry.

A Registered Professional Engineer and a Six Sigma Master Black Belt, Mr. Yeager is uniquely qualified to steer the Clean Water Technology organization to new heights.

When accepting his role as CEO, Mike stated, "I am looking forward to supporting the Clean Water Technology team in their efforts to bring the best available wastewater treatment technologies to those companies seeking to be the best in class. I am excited to join CWT, a company that is strongly committed to delivering the best, most effective product to its customers. The engineering and management teams at CWT are constantly innovating with their global partners to find the best solution for their customers."

Clean Water Technology (CWT) provides sustainable turn-key wastewater treatment solutions to processors worldwide. CWT's GEM® System and DAF retrofits minimize footprint, sludge, chemical usage, energy and water use – easily adapting to changing streams and future expansions. CWT's GEM® System, Anaerobic, and Aerobic Systems lead the industry in contaminant removal, chemical efficiency and beneficial by-product generation.
